Mr. Swanson, (Dem.) a member of the ways and means committee, argued that depressed conditions of the manufacturing industries had not resulted from foreign competition, but that the home manufacturer had lost his market not because the foreigner had taken it, but because his customers were too poor to make purchases; that relief could not come to the manufacturer until the price of wheat, corn, oats, tobacco and of other products increased.

He insisted that the low price of these resulted from the appreciation of gold, which would continue so long as silver was demonstized. He said that the committee had left the impression that the sugar trust only received a differ-ential of one-eighth of a cent per pound, but asserted that this was not true, and that the differential in favor of the trust ranged from one-fourth to seveneighths of a cent per pound.
